## VEHICLE EXCISE DUTY (VED)

Co 2 May 2009, there was a change to the Vehicle Excise Duty (VED) tax bands. Cars are taxed according to their CO2 emissions, in bands A to M.

All vehicles first registered on, or after, 23 March 2010 are subject to a new form of VED (Road Fund Licence). This new duty is based on a vehicle's CO2 emissions and not its carbon dioxide (CO2) emissions level, measured in grams per kilometre (g/km). To help us identify the duty you will pay, the DVLA has created a new category, called the CO2 emissions band, based on the weight of a vehicle, including higher tax levels and the addition of options will have an effect on the CO2 emissions. The CO2 emissions and CO2 emissions produced.

The CO2 and fuel consumption figures are obtained from tests on a representative vehicle of the type, conducted and approved in accordance with Council Directive 80/1268/EEC as amended by Directive 93/116/EC. The figures do not reflect the variation of the tests of the member states relating to the carbon dioxide emissions and the fuel consumption of motor vehicles.

**VED band 'First year rate'**

As of 1 April 2010, anyone buying a new car will pay a 'First year rate' of VED for the first Road Fund License. The chart below shows the VED bands and the charges which are levied:
